**Project Title: To Supply Leftover Food to Poor** 

Category: Salesforce

Skills Required: Salesforce Developer

# 1. Project Overview

## 1.1 Project Objectives and Goals

**Objective:** This project aims to develop a Salesforce-based application designed to manage and streamline the distribution of leftover food to underserved communities. The primary goal is to enhance the efficiency of food drop-offs, coordinate tasks, manage volunteers, and generate insightful reports.

# 2. Detailed Description of Implemented Features

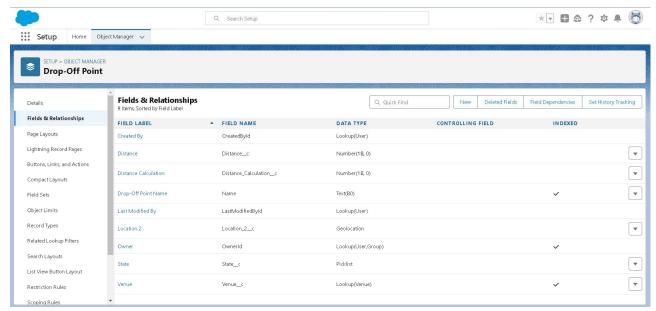

## 2.1 Custom Objects

#### 1. Drop-Off Point:

■ **Purpose:** The Drop-Off Point object captures essential details about locations where food is dropped off. This helps in tracking and managing food distribution points effectively.

#### ■ Fields:

- **Drop-Off Point Name:** A text field representing the name of the drop-off point.
- **Location Details:** A text field for additional details about the drop-off point location.
- **Distance:** A number field that records the distance from the drop-off point to the delivery area.
- Venue: A lookup relationship field linking to the Venue object to provide a connection between drop-off points and venues.

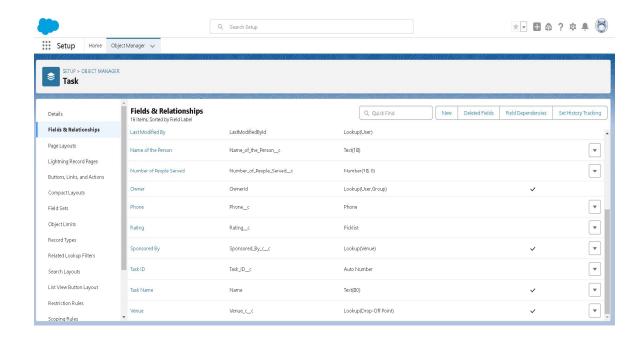

#### 2. Task:

■ **Purpose:** The Task object is used to manage and track various tasks related to food distribution, including assigning tasks to volunteers and recording task details.

#### Fields:

- **Task Name:** A text field representing the name of the task.
- Date: A date field indicating when the task is scheduled or completed.
- o **Rating:** A numeric field used to rate the task performance.
- **Drop-Off Point:** A lookup relationship field linking to the Drop-Off Point object to associate tasks with specific drop-off points.
- **Sponsored By:** A lookup relationship field linking to the Drop-Off Point object to indicate the sponsor of the task.

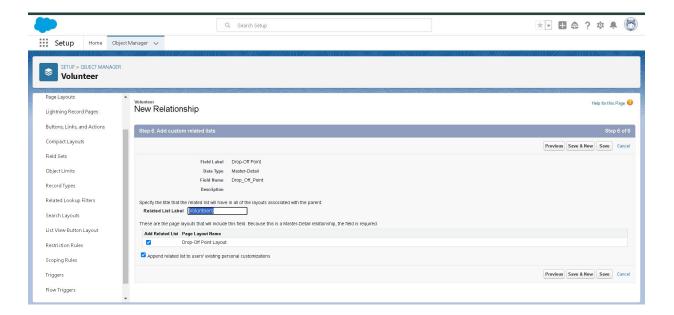

#### 3. Volunteer:

■ **Purpose:** The Volunteer object keeps track of individuals who are involved in the food distribution process, including their contact information and assigned tasks.

#### ■ Fields:

- Volunteer Name: A text field for the name of the volunteer.
- Contact Email: An email field for the volunteer's contact email.
- **Contact Phone:** A phone field for the volunteer's contact number.
- **Assigned Tasks:** A related list showing tasks assigned to the volunteer.

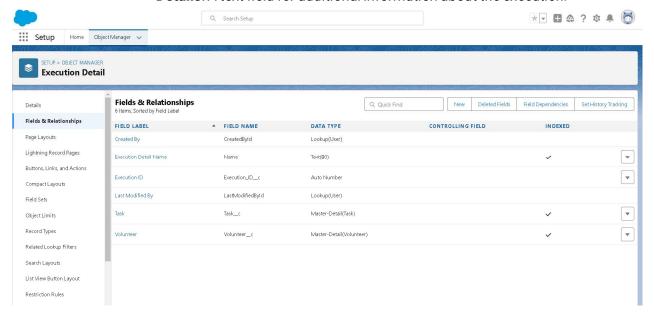

#### 4. Execution Detail:

■ **Purpose:** The Execution Detail object captures detailed information about food distribution activities, including which volunteers and task are associated with each distribution.

#### ■ Fields:

- **Execution Detail Name:** A text field for naming the execution detail record.
- **Volunteer:** A master-detail relationship field linking to the Volunteer object to associate execution details with a specific volunteer.
- **Task:** A master-detail relationship field linking to the Task object to associate execution details with a specific task.
- **Details:** A text field for additional information about the execution.

## 2.2 Object Relationships

- Master-Detail Relationships:
  - Execution Detail to Volunteer: Ensures that each execution detail record is linked to a volunteer, making volunteer information essential for each distribution record.
  - Execution Detail to Task: Ensures that each execution detail record is linked to a task, making task information essential for each distribution record.
- Lookup Relationships:
  - Task to Drop-Off Point: Connects tasks to drop-off points, providing context on where each task is executed.
  - Task to Volunteer: Connects tasks to volunteers, enabling tracking of which

volunteer is responsible for each task.

■ **Drop-Off Point to Venue:** Links drop-off points to venues, facilitating a detailed understanding of where food is being dropped off.

## 2.3 Sharing Rules

To ensure that records are shared appropriately based on distance criteria, the following sharing rules were set up:

#### • Rule 1:

■ Label: Rule 1

■ Criteria: Records where the distance is less than 15 km

■ Access: Shared with Public Group - Iksha

#### • Rule 2:

■ Label: Rule 2

■ Criteria: Records where the distance is between 15 km and 30 km

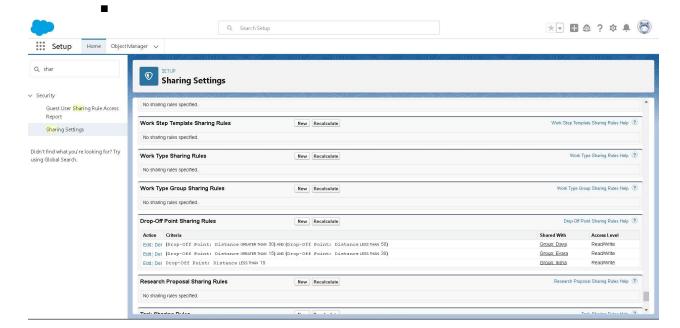

■ Access: Shared with Public Group - NSS

#### Rule 3:

■ Label: Rule 3

■ Criteria: Records where the distance is between 30 km and 50 km

■ Access: Shared with Public Group - Street Cause

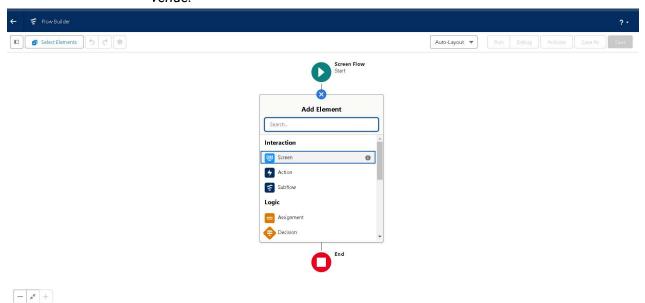

#### 2.4 Flow and Dashboard

Flow: Venue Flow

■ **Purpose:** To manage and capture detailed information related to food drop-off points.

### Components:

- **Text Component:** For entering the venue name.
- **Email Component:** For entering the contact email of the venue.
- **Phone Component:** For entering the contact phone number of the venue.
- **Text Component:** For entering the venue location.
- **Number Components:** For entering latitude and longitude values of the venue.

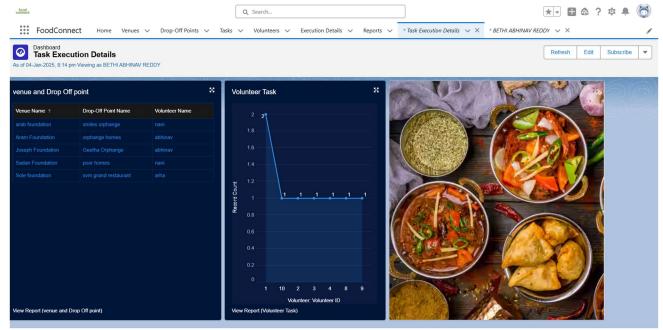

#### Dashboard:

■ Name: Organization Details

#### Components:

• **Lightning Table:** Displays detailed information about venues and drop-off points, facilitating a comprehensive view of the data.

# 3. Configuration and Setup Instructions

## 3.1 Creating Custom Objects

## 1. **Drop-Off Point:**

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for **Drop-Off Point**.

#### 2. Task:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Task.

#### 3. Volunteer:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for Volunteer.

#### 4. Execution Detail:

- Navigate to Object Manager > Create > Custom Object.
- Enter details such as the label name, record name, and other settings for
  Execution Detail.

## 3.2 Sharing Rules Setup

- Go to Sharing Settings.
- Define new sharing rules for **Drop-Off Point** based on distance criteria, ensuring appropriate access for different public groups.

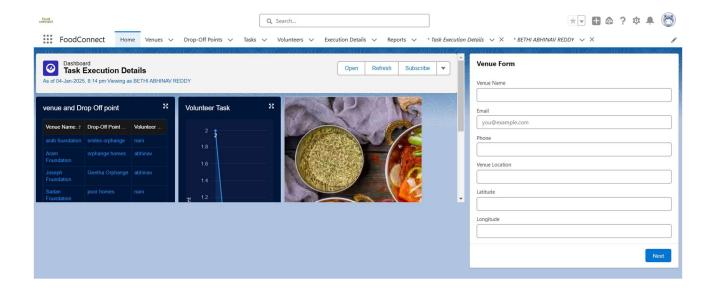

### 3.3 Lightning App Builder

#### 1. Create Home Page:

- Go to Lightning App Builder > New.
- Select Home Page and name it "HOME Page".
- Add Flow and Dashboard components to the page.

#### 2. Save and Activate:

- Click on Save and Activation.
- Set the page as the default for the **FoodConnect** app.

# 3.4 Report Types and Dashboards

#### 1. Custom Report Types:

■ Create report types for Venue with Drop-Off with Volunteer and Volunteers with Execution Details and Tasks.

#### 2. Reports:

 Generate and configure reports using the custom report types to track and analyse relevant data.

#### 3. Dashboards:

 Configure dashboards to visualise data from reports and other components, providing insights into the overall distribution process.

# 4. Deliverables

- **Code Files:** Include Apex triggers and any other code implemented.
- Output Screenshots: Provide screenshots of custom objects, flows, dashboards, and reports to illustrate the setup.
- **Project Documentation:** Detailed descriptions of implemented features, configurations, and setup instructions.
- **Project Demonstration Video:** A video showcasing the functionality of the application, including key features and processes.
